

WATERING TUB – NOTICE OF NON-POTABILITY

Based on the recommendation of the NYS Department of Health, the Town of Horicon has posted the water source in Brant Lake known as the “Watering Tub” as non-potable. Even though the water has always been tested regularly, the Department of Health states that this does not eliminate all possibility of contamination and, therefore, the “Watering Tub” is **not** an acceptable source of public drinking water.

Therefore, the “Watering Tub” will be posted as non-potable based on the recommendation of the NYS Department of Health and people should seek an alternate source of drinking water.
